# LAPTOP RAM SLOT TESTER

Description:

-Laptop 144 pin SD Memory Testing Board
-Laptop 200 pin DDR Memory Testing Board
-Laptop 200 pin DDR2 Memory Testing Board
-Laptop 204 pin DDR3 Memory Testing Board
-There are a lot of testing pins in this board ---- clock, reset, voltage signals etc... Through measuring the resistance value, it can determine the slot working or not in accurate way.
-Easy to find out the test points for hardware repair, it is an useful tool.
-Save Time and easy to determine the root cause through measuring test points,
-Suitable for user without technical background and No need to take up any professional training in the computer chip-level maintenance.
-Boards contains various signals, voltages, clock, address and data line signal testing points.
