

Rework Station-CT-958D

Features:

- Micro computer controlled, double VFD colorful display.
- Multi-Function of Hot Blow Teworking, Lead Free Soldering and
- Automatic De-soldering, all sections working separately and be controlled precision.
- Many styles of unloading state, automatic failure judgment and the function of setting restrict, etc, to make the apparatus work more conveniently.
- The combination of the multifunction of the system can be competent for all kinds of disassembling and fitting.

Specifications:

Soldering Output Voltage	24V AC
Temperature	200°C-480°C
Stability of Temperature	1°C @ No load
De-soldering	
Output Voltage	27V AC
De-soldering Pump	Slice Type
Vacuum Pressure	680mmHg
Inhalation Airflow	15L/min
De-soldering Temperature	280°C-450°C
Hot blow unsoldering	
Output Voltage	220V AC
De-soldering Pump	Slice Type
Capacity	24L/min
Temperature Adjustable	100°C-480°C
